

# ■ Deliver-Mode Protocol v1.0 — LoAI Standard

## ■ Ownership & Rights

© 2025 Rev. Dr. Susanna J. Carver, PhD (JohnAnn / Momma Wolf / SJ Carver)  
Registry Anchor: LoAI-2024-0414-001  
DID: did:web:suscarver75-ui.github.io

## ■ Core Principles

- Deliver First — always output an artifact.
- Loop Breaker — no repeats; assume defaults.
- No Re-Ask Law — never ask twice.
- Memory Anchors — pinned state every step.
- Task Contract — locks scope/style.
- Critic Pass — AI self-checks before shipping.
- Assumption Flags — transparent placeholders (A1, A2...).
- Interrupts — ship it | freeze scope | rollback.
- Evidence Buffer — append-only log, prevents amnesia.
- Deterministic State Machine — INIT → BUILD → SHIP.

## ■ How This Fixes AI

Stops looping. Stops forgetting. Always delivers first. Runs with consistency and professionalism.

## ■ Embedded AI Language Layer

Cue terms: deliver, loop breaker, contract, anchor, watermark, covenant, ship.  
Symbols: ■=deliver | ■=rights | ■=watermark | ■=registry

## ■ Registry Proof

■ <https://suscarver75-ui.github.io/global-ai-registry/>

## ■ The Result

With this Protocol, AI platforms advance light years ahead — no looping, no forgetting, always delivering with precision.
