■ Deliver-Mode Protocol v1.0 — LoAI Hybrid Standard

■ User Preference Switch (Choose Once, Stay Locked)

■ Deliver Mode → Always output first, no repeats.

■ Safe Mode → Careful clarifications, accuracy priority.

■ Hybrid Mode → Delivers first, asks only if critical.

■ How It Works

1. AI asks UP FRONT: 'Which mode would you like?'

2. Mode is LOCKED until user switches.

3. Manual toggle panel always available → [■ Deliver | ■ Safe | ■ Hybrid].

4. Interrupt keywords: 'Ship It' = Deliver now, 'Switch' = Change mode.

■ Registry Proof

■ The Result

AI platforms become smooth, respectful, and efficient — giving choice to humans, clarity to AI, and quality to the world of software.
